POLYTECHNIC UNIVERSITY OF CATALONIA

Master of Engineering in Computer Engineering

09.2024 - 06.2025

UNIVERSITY OF BARCELONA

Bachelor of Engineering in Computer Engineering

09.2020 - 06.2024

SKILLS

- **Frontend:** JavaScript, TypeScript, React, Next.js, Angular, Electron, WPF
- **Mobile:** React Native, Kotlin Multiplatform, Swift/iOS
- **Backend:** .NET, Node.js, Nest.js, Laravel, GraphQL
- **Database:** PostgreSQL, MySQL/SQLite, MongoDB, Redis, RabbitMQ, Elasticsearch.
- **DevOps:** Docker, K8s, AWS, Azure, Nginx, CI/CD (Jenkins), Unit/E2E Testing
- **Agentic:** LLM APIs, Vector DB, RAG, embeddings, MCP

Interests

Agentic Systems
System Architecture Design
High Performance Computing

WORK EXPERIENCE

Software Engineer | ALTECH Solutions & Consulting

03.2025 - Present

- Contributed to the concurrent delivery of 6 large-scale public service platforms across Spain serving **16M+** end users, including Park Güell, ZBE/AMB, Taxi Mallorca, Ambulance Madrid, Flexitransport/AMTU, and BSM license plate system
- Acted as **team lead** for Park Güell and ZBE (AMB), driving architecture decisions, task allocation, and implementation details
- Collaborated directly with clients, ensured smooth delivery, and provided ongoing maintenance and on-call support

Research Assistant (Research Collaboration) | BSC & Idaea-CSIC

03.2025 - 05.2026

- Optimized a large-scale hydrological model for **HPC** clusters using task-based parallelism and distributed scheduling
- Achieved up to **35x** speedup over the baseline implementation; results accepted for presentation at **EGU 2026**

Software Developer | Herta

04.2024 - 03.2025

- Built AI-powered surveillance software including a **.NET WPF** desktop application and a SaaS application on Azure (.NET, Angular)
- Designed and implemented end-to-end automated testing for desktop applications and integrated it into CI/CD pipelines (GitLab CI), reducing manual testing time by **~90%** and improving deployment reliability

iOS & ML Developer (University-Industry Collaboration) | LogMeal Food AI

09.2023 - 07.2024

- Developed an iOS app and an open-source native iOS SDK for real-time food recognition using computer vision; showcased the product at **MWC 2024** (Mobile World Congress).
- Trained and optimized a multi-task CSwin Transformer for fine-grained food classification on an 800+ category, 500K+ image dataset, improving top-1 accuracy from 47.7% -> 81.5% (**+33.8pp**) through architecture tuning

Software Developer | Awaait Artificial Intelligence, S.L.

05.2023 - 04.2024

- Developed and maintained all core company products, including subway and bus fare evasion detection systems, a camera health monitoring assistant, and a backoffice platform
- Participated in tender teams, building technical demos and proof-of-concept solutions to support new client proposals

Full Stack Developer (Internship) | CSI Central de Suministros (True-makers, S.L.)

06.2022 - 10.2022

- Developed and maintained a full-stack e-commerce B2B platform using PHP(Laravel), React (Next.js) and MySQL

PROJECTS

Independent Commercial Products

01.2026 - 05.2026

- Independently designed, built, and launched 4 commercial products using agentic development workflows Claude Code, CodeX; All products are live with paying clients.

Competitions

10.2022 - 04.2023

- Finalist — Aigues de Barcelona Data Challenge: built an AI water consumption forecasting app using PyTorch across industrial, domestic, and tourism sectors.
- 2nd Place — HackForGood 2022: built an AI waste classification system for automated recycling sorting.
